

THE JOURNAL OF THE SOCIETY OF AUTOMOTIVE ENGINEERS

INDEX TO VOLUME XII, JANUARY-JUNE, 1923

	PAGES	Annual Meeting, S A E	Papers for Program		
January	1-136	Aeronautic session	237	Report of	490
February	137-254	Body engineering session	247	Automotive vehicle insurance	596
March	255-322	Detonation session	239		
April	323-410	Detroit in 1924	243	Automotive Vehicles	
May	411-514	Dinner	250	Critical study of modern steering-systems	377
June	515-632	Dinner broadcasted	245	Insurance	596
		Engine-cooling session	242	Automotive work as a "profession" (Dr C A Prosser)	17
A		Fuel session	238		
Abrasive qualities of steels	76	Meetings Committee report	232	Aviation	
Accomplishment of American automotive engineers in fuel economy	311	Membership Committee report	231	Dangers of flight	342
		Program	130	Development of the Hannover sail-plane	77
Addresses		Radio broadcast of dinner speeches	131	Inducing the public to fly	351
Banham, W J L	498	Railroad fares reduced	131	Influencing the public	351
Binkerd, Robert S	499	Report of	241	International Air Congress	353
Bradute, O E	501	Research session	241	Passenger-carrying flying-boat operation	351
Hasson, J O	504	Sections Committee report	233	Safety and comfort as inducements to travel	342
Jordan, E S	308	Treasurer's report	10, 232	Axis of oscillation	314
Lee, Elisha, at annual dinner	151	Annual report of treasurer	10		
Of members wanted	292	Apparatus and procedure for gaseous detonation experiment	370	Axle and Wheels Division, S A E	
Presidential of B B Bachman	167	Arms, tie-rods and tie-rod	388	Accepted recommendations	218
Swayne, Alfred H	498	Army plan, development of	426	Activities	124, 315, 316, 404, 486, 561
Advantages of natural-gasoline blends	275	Army plan of highway transport	421	Personnel	189, 262, 566
Advisory Board on highway research	294	Australia, S A E in	489	Report at annual meeting	219, 229
Aeronautic session at annual meeting	237	Automobile fatalities	534	Report at semi-annual meeting	566
		Automobile finishing-varnish (L V Pulsifer)	89, 335, 456		
Aeronautic Division, S A E		Automobiles		Axles	
Activities	561	Across the Sahara Desert by	502	Changes in condition	534
Personnel	189, 509	Advance toward simplified body construction	213	Class-B Army	530
Aeronautics		Advantages of fabric-covered body	216	Investigation of some heavy-duty truck drive	517
Navy airship inspected	131	Aircraft-engine practice as applied to air-cooled engines	31	Lubricant	523
Terrain for glider contests	275	Axis of oscillation	314	Possibilities of improvement in efficiency	529
		Causes of poor service	193	Results of tests	523
Agricultural Power Equipment Division, S A E		Changes in body construction	213	Selection of B	534
Activities	404, 561	Cheaper closed-body construction	213, 450	Test methods and equipment	520
Personnel	189, 565	Closed-body quantity-production	177	Test procedure	521
Report of semi-annual meeting	565	Closed-car demand increasing	85	Test program	522
Air and water-cooled type comparisons	51	Cooling capacity of radiators	57	Wheels and	595
Air-cleaners for tractor engines, test of	376	Development constituents	87		
Air-cooled cylinder layout	31	Development of a modern service-system	193, 539	B	
Air-cooled cylinders, foundry production of	53	Developments and prophecies	177	Bachman, B B, presidential address	167
Air-cooled versus water-cooled engine	332	Drivers' comments on test	7	Balance, new principles in rotative	562
Aircraft-engine practice as applied to air-cooled passenger-car engines (S D Heron)	31	Economic fuel volatility	139	Ball and Roller Bearings Division, S A E	
		Experience notes from a production notebook	22	Activities	124, 127, 404, 561
Aircraft		Factory inspections	206	Personnel	189, 509, 566
Air-cooled versus water-cooled engines	332	Fatalities	534	Report at semi-annual meeting	566
Former and present engine tests	326	Field conditions	205	Unaccepted recommendations	225
Influence of powerplant weight on transportation costs	334	Finishing-varnish	89, 335, 456	Banham, W J L, address	498
Progress made in engine development	326	Follow-up on repair-jobs	203	BARNARD, DANIEL P, ON FURTHER DATA ON THE EFFECTIVE VOLATILITY OF MOTOR FUELS	287
Recent developments in engines in the Navy	325	Gasoline mileage	5	Bars, determining the magnetic properties of short	209
		Good service as a sales asset	193	BAYER, L F, ON PROPER UTILIZATION OF NATURAL GASOLINE	273
Air Mail Service		New attitude toward service	193	Belt speeds	588
Effect on the airplane designer	264	Notes on spring action	312	Benzene as engine fuel	187
What it has demonstrated	263	Painting practice from the chemist's viewpoint	335	BERSIE, HUGH G, ON TAXICAB-BODY CONSTRUCTION	480
		Periods of vibration	312	BESSON, MAJOR F S, ON HIGHWAYS AND TRAFFIC IN A CITY	612
Airplanes		Practical considerations in body construction	215	BINGHAM, DR W V, ON STANDARDIZED MENTAL TEST IN PERSONNEL SELECTION	272
Cross-licensing	298	Resale value of	10	Binkerd, Robert S, address	499
Design of commercial	155, 363	Service and its relation to the industry	265, 535	Biplane and monoplane comparison	84
Economy of design	156	Some unique features of production	25	BJORNBERG, S O, ON HOW TO USE GEAR-CUTTING HOBS	181
Effect of the designer of mail service	264	Stock-department supervision	205	Blast direction	42
Elimination of noise	158	Taxation on a tire consumption basis	61	Blended fuels	274
Fundamental principles of design of military	614	Test	140	BLYTHE, R R, ON SAFETY AND COMFORT AS INDUCEMENTS TO AIR TRAVEL	342
Government's peacetime problem	297	Tested	3		
Immediate possibilities of commercial service	263, 359	Testing leather substitutes and ton materials	276, 449	Bodies	
Military development and construction in peacetime	296, 361	24-hr. service on Ford	265	Actual advantages of fabric covered	216
Old designs and slow delivery	297	Unconventional type of body	214	Advance toward simplified construction	213
Safety	157	Weight distribution	314	Changes in construction	213
Size	156	Wheel-wobble	384	Cheaper closed construction	213
Speed and comfort	158			Demountable "flats"	444
Air supply	42	Automotive Industry		Frame stiffness and structure	596
Alloys, copper-rich bearing	615	Cost considerations	88	Methods of joining frame members	481
		Maintenance effects of electrical-equipment standardization	538	Practical considerations in construction of	215
Aluminum		Petroleum and automotive engineers discuss common problems	118	Taxicab construction	480
Casting alloy cylinder-heads	55	Problems in front of the engineer	86	Unconventional type of	214
Gating for alloy casting	56	Service cooperation between manufacturer and dealer	205	Woods suitable for taxicab framework	481
American farmers, 1922 returns to	544	Training mechanics	99		
Amplification of the Army study	430	Transfer of energy	86	Body engineering session at annual meeting	247
Angular position of knuckle-pivots	381	Work as a "profession"	17	Bradute, O E, address	501
		Automotive-service cooperation between manufacturer and dealer (J F Page)	205	Brakes, four-wheel	611
		Automotive transportation by trailers (E R Greer)	19	BRAUTIGAM, H H, ON 1922 AND THE MOTORBOAT INDUSTRY	302
		Automotive transportation development	468		
		Automotive Transportation Meeting, S A E			
		Announced	244, 306		
		Dinner	497		

BRODIE, J., ON EXPERIENCE NOTES FROM A PRODUCTION NOTEBOOK	22	Construction of plywood roof	483	Detonation	
BRUNO, H. A., ON PASSENGER-CARRYING FLYING-BOAT OPERATION	351	Consumers' prices, spread in producers' and	596	Apparatus and procedure for experiment	370
Burton process of cracking	510	Control charts for service	201	Application of gaseous to internal-combustion engines	369
Business outlook	176	Cooling capacity of automobile radiators (E H Lockwood)	57	Laws governing gaseous	367, 458
				Representation of, by pressure-volume-quantity indicator-card	109
C		Cooling		Development of a modern service-system (Don T Hastings)	193, 539
Camshafts, valve-gear arrangement and Carbon dioxide, effect of inert	38, 319	Capacity charts	60	Development of Army plan	426
		Exhaust valve	40, 51	Development of the Hannover sailplane (Georg H Madelung)	77
Carbureters		Marine engines	257	Dilution, crankcase-oil tests	144
Commercial metering characteristics	74	Surface	36		
Requirements	73	System for in-line engines	42	Dinners	
Carburetion		Coordination of the motorbus and the street railway (C D Emmons)	433	Annual	250
Experimental survey of gasoline and kerosene	63, 460	Copper-rich bearing alloys (C L Landon)	615	Automotive transportation	497
Gasoline	66			Distance of haul and economy of operation	471
CARLSON, R. E., ON ECONOMIC MOTOR-FUEL VOLATILITY	139	Costs		Double-reflector type of head-lamp (Bruno Heymann)	100
Cartage-practice a standard for our railway-terminal trucking, English	437	Cartage and tonnage hauled	444	Drag-link location	385
		Considerations	88	Drivers' comments	7
Cartage		Delay and excessive cartage	439	Drivers of automobiles tested	4
Control system	440	Influence of powerplant weight on transportation	334	Driver's responsibility for fuel waste	311
Costs and tonnage hauled	444	Operation of trailers	20	DRUMMOND, R. S., ON GEAR GRINDING	173
Delay and excessive cost	439	Quality of motor fuel and	310	Drying and safety of working tests of varnish	92
English practice a standard for our railway-terminal trucking	437	Research reduces highway	129	DUESENBERG, F. S., ON ENGINEERING INFORMATION FROM THE RACE TRACK	616
English railway system	439	Securing data on service	271	DUNK, WILLIAM, ON SOME UNIQUE FEATURES OF AUTOMOBILE PRODUCTION	25
Opinions regarding the English system	445	Taxicab body	483		
Unified control of	444	Transportation	436	E	
Castering or trailing effect	382			EASON, C. M., ON GENERAL-PURPOSE FARM TRACTOR	597
Casting aluminum-alloy cylinder-heads	55	Council Meetings, S A E		Economic motor-fuel volatility (R E Carlson)	139
		December, 1922	18	Economy, airplane design for	156
Castings		January, 1923	178	EDGAR, JOHN, ON HOBGING-MACHINE OPERATION	179
Aluminum-alloy cylinder-head	55	February	262	Education of engineers	286
Gating for aluminum-alloy	56	April	509	Effect of inert carbon dioxide	319
Causes of poor service	193			Effect of interior finish	319
Cement, record production of Portland	472	Cracking processes in the petroleum industry (Frank A Howard)	510	Effect of load	70
Central committee on lumber standards	98	Cracking		Efficiency	
Chain Division, S A E		A licensing patent	511	Possibilities of improving axle	529
Accepted recommendations	218	Burton process	510	Tractive	588
Activities	561	Facts of the matter	510		
Personnel	189	Highly developed by Americans	510	Electric Vehicle Division, S A E	
Report at annual meeting	219	Patented methods mostly infringements	511	Accepted recommendations	218
Changes in axle condition	534	Processes in petroleum industry	510	Activities	404, 405, 561
Changing aspect of transportation	447	CRAIN, H. J., ON EXPERIENCE NOTES FROM A PRODUCTION NOTEBOOK	22	Personnel	190, 571
Characteristics of a satisfactory signal	476	CRANE, H. M., ON CONNECTION OF THE RESEARCH COMMITTEE WITH FUEL RESEARCH	207	Report at annual meeting	220
Charges, flat-rate system for service	194	Crankcase oil dilution and oil consumption	7	Report at semi-annual meeting	571
CHASE, HERBERT, ON CRITICAL STUDY OF MODERN AUTOMOTIVE-VEHICLE STEERING-SYSTEMS	377	Crawler type general-purpose tractors	604	Subjects assigned	18
Chassis, tractor	594	Credits, rural	301		
Cheaper closed-body construction (George J Mercer)	213, 450	Critical study of modern automotive-vehicle steering systems (Herbert Chase)	377	Electrical Equipment Division, S A E	
Chemist's viewpoint, painting practice from the	335	Cultivation obstacles	603	Accepted recommendations	218
		Cultivators, power	600	Activities	404, 561
Chicago Service Meeting, S A E		Current literature, survey of	375	Personnel	190, 568
Announced	132	Current standardization work	124, 315, 404	Report at annual meeting	220
Discussion of papers	535	Current work of the Standards Committee	561	Report at semi-annual meeting	568
Report	307	Cylinder heads, casting aluminum-alloy	55	Electrical-equipment standardization, maintenance effects of automotive	283, 538
Technical sessions	307	Cylinders		Electrical resistance, importance of a minimum	479
Chronicle and comment	1, 137, 255, 323, 411, 515	Air-cooled layout	31	Elimination of noise in airplanes	158
CITROËN, ANDRÉ, ON CROSSING THE SAHARA DESERT BY AUTOMOBILE	502	Cooling surface	36	EMMONS, C. D., ON COORDINATION OF THE MOTORBUS AND THE STREET RAILWAY	433
Class-B Army axles	530	Design of air-cooled	32	Energy, transfer of	86
Closed-car demand increasing	85	Exhaust-valve cooling	51	Engine-cooling session at annual meeting	242
Clutch, marine engine	260	Experimental development of air-cooled engine	46		
Coat-finishing exhaust manifolds	21	Form of head	33	Engine Division, S A E	
COLEMAN, C. T., ON MOTOR-TRANSPORT PERFORMANCE WITH VARIED FUEL VOLATILITY	343	Foundry production of air-cooled	53	Accepted recommendations	218
Comfort and safety as inducements to air travel	342	Gating for aluminum-alloy casting	56	Activities	125, 404, 406, 561
Commerce Department meeting	365	Laws governing gaseous detonation	367	Personnel	190, 573
Commercial carburetor metering characteristics	74	Material	34	Report at annual meeting	221
Commercial organization under the Army plan	428	Performance investigations	47	Report at semi-annual meeting	573
Committees		Performance of air-cooled	32	Engineer, retailer and the	465
Administrative, S A E, personnel	179	Performance of multi-	48		
Personnel of Standards	189	Quantity of air	43	Engineering	
Simplification Conference	365	Temperature of	38	Application of principles	465
Standards meeting	217	D		Stationary internal-combustion developments	304
Comparison of cooling capacity of radiators	59	Dangers of flight	342	Problems	473
Comparison of steering-gear types	386	Dash-boards, types of taxicab	483	Two phases of tractor	188
Compression, internal-combustion engine characteristics under high	111, 354	Data Sheets, March, 1923, issue	407	Engineering aspects of traffic (William P Eno)	473
Connection of the Research Committee with fuel research (H M Crane)	207	DAVIS, J. B., ON TESTING LEATHER SUBSTITUTES AND TOP MATERIALS	276, 449	Engineering information from the race track (F S Duesenberg)	616
Consciousness, professional	17	Defects of tractors	593		
Constitution Committee, S A E, personnel	178	Delay and excessive cartage cost	439	Engineers	
		Demountable "flats" or bodies	444	Education of	286
		Department store expense	465	Highway research	294
		Design of commercial airplanes (E P Warner)	155, 363	Relation of automotive to highway	295
		Destructive competition between railways and motorbuses	436		
		Detailed consideration of three-dimensional indicator-card surfaces	106		
		Determining the magnetic properties of short bars	209		
		Detonation	70		
		Detonation session at annual meeting	239		

INDEX TO VOLUME XII

627

Engines

Accessibility of marine	260
Accessories for marine	260
Air and water-cooled type comparisons	51
Air-cooled versus water-cooled	332
Aircraft-engine practice as applied to air-cooled passenger-car	31
Air supply	42
Application of gaseous detonation to internal-combustion	369
Application to the internal-combustion	369
Benzene as fuel	187
Clutch and reverse-gear on marine	260
Coat-finishing exhaust-manifolds	21
Cooling marine	257
Cooling system for in-line	42
Direction of rotation of high-speed marine	261
Effect of load	70
Equipment and apparatus for tests	114
Experimental development of air-cooled cylinders	46
Factors	119
Former and present aircraft tests	326
Fuel-air mixture requirements for	72
Fuel in	310
High-compression performance tests	112
Idling and general operation of marine	259
Influence of powerplant weight on transportation costs	334
Installation requirements of high-speed marine	261
Internal-combustion, application to tractors	598
Internal-combustion characteristics under high compression	111, 354
Laws governing gaseous detonation	367
Low-temperature operation	119
Lubrication of high-speed marine	258
Methods of tests	11
New interpretation of exhaust-gas analysis	299
New types	120
Performance and design of air-cooled cylinders	32
Port-arrangement for in-line	37
Pressure-volume-quantity indicator-card	105
Progress made in aircraft development	326
Recent developments in aircraft in the Navy	325
Reduction in weight in aircraft	329
Results of tests	116
Sleeve-valve types	38
Starting marine	258
Tendencies in high-speed marine design	257
Test of air-cleaners for tractor	376
Test procedure	115
Testing fuels for high-compression	11, 358
Tractor	593
English cartage-practice a standard for our railway-terminal trucking (F C Horner)	437
English-railway cartage-system	439
ENO, WILLIAM P. ON ENGINEERING ASPECTS OF TRAFFIC	473
Equilibrium-solution preparation	287
Essentials of signal-system design	476
Evolution	585
Exhaust-gas, new interpretation of analysis	299
Exhaust-valve cooling	40, 51
Experience notes from a production notebook (H J Crain and J Brodie)	22
Experimental development of air-cooled engine-cylinders	46
Experimental survey of gasoline and kerosene carburetion (C S Kegerreis and G A Young)	63, 460
Exports	564

F

Factory car-inspections	206
Fans	45
Farm and urban industries	76
Farm equipment, utilization of existing	606

Farmers

Living-wage for 1922 returns to American	408
Fatalities, automobile	544
Fatigue of metals	534
Federal agencies	123
Federal Reserve Banks reserve-ratio	294
Federal road money	341
FENNER, DAVID C. ON OVER-LOADING OF MOTOR TRUCKS	122
Finance Committee, S A E, personnel	210
Finances, S A E	178
Finning, valve location and type of	169
	32

Flat Rates

Limitations of, for service	201
System for service charges	194, 271, 307

Foregather or toe-in of wheels	382
Foundry production of air-cooled cylinders	53
Four-wheel brakes (Malcolm Loughhead)	611
Frame stiffness and body structure	596

Frames Division, S A E

Accepted recommendations	218
Activities	404, 561
Personnel	190, 574
Report at semi-annual meeting	574
French test of producer-gas trucks	85
Fuel-consumption tests	140

Fuel Economy

Researches to promote	311
Society's interest in	310
Summary of factors affecting	312

Fuel Problem

Present status	120
Society's research sheds new light on	3
Fuel session at annual meeting	238
Fuel waste, its causes and remedies	310

Fuels

Accomplishment of American automotive engineers in economy	311
Air mixture requirements for engines	72
Average molecular-weight determination	289
Benzene as engine	187
Blended	274
Comparison of gasoline and kerosene	65
Connection of the Research Committee with research	207
Consumption of tractors	592
Consumption tests	140
Continuation of road tests	208
Cost and quality of motor	310
Cylinder	46
Economic motor volatility	139
Effects of volatility investigated	312
Equilibrium-solution preparation	287
Experimental survey of gasoline and kerosene carburetion	63
Further data on the effective volatility of motor	287
In the engine	310
Investigated	289
Limits of accuracy of test	6
Mixture adjustment and waste	311
Motor-transport performance with varied volatility	343
Partial-pressure calculation	289
Proper blends of	274
Researches to promote economy	311
Responsibility of driver	311
Road tests	208
S A E interest in economy	310
S A E research sheds new light on problem	211
Selection for test	3
Summary of factors affecting economy	312
Test	140
Testing for high-compression engines	11
Vapor-pressure measurement	288
Volatility	209
Waste, its causes and remedies	310
Fundamental principles of design of military airplanes (W F Gerhardt)	614
FUNDERBURK, OTIS C. ON SERVICE AND ITS RELATION TO THE INDUSTRY	265, 535
Further data on the effective volatility of motor-fuels (Robert E Wilson and Daniel P Barnard, 4th)	287

G

Gaseous explosions, pressures in	319
----------------------------------	-----

Gasoline

Advantages of natural blends	274
Blended fuels	274
Carburetion	66
Comparison of kerosene and	65
Mileage	5
Natural	120
Processes of natural	273
Proper utilization of natural	273
Results of tests	274
Seventh semi-annual survey	397
Specifications	118
Usage of natural	273
Gating for aluminum-alloy casting	56
Gear grinding (R S Drummond)	173
Gear-grinding and tooth-forms (Glenn Muffy)	545
Gear-tooth grinding	547

Gears

Camshaft and valve arrangement	38
Checking dimensions	185
Control of hobs	182

Cost of grinding	174
Grinding	173
Grinding and tooth-forms	545
History of grinding	174
Hobbing-machine operation	179
How to use hobs for cutting	181
Modification of tooth-curves	552
Noise	554
Pitch-diameter	553
Salvaging versus finish-grinding	173
Some causes of tooth errors and their detection	26
Testing grinding accuracy	550
Tooth-form	175
Tooth grinding	547
Tooth spacing	551
Types of machine for grinding	174
Wear	176

General-purpose farm tractor (C M Eason)	597
General-purpose machinery	602
GERHARDT, W F. ON FUNDAMENTAL PRINCIPLES OF DESIGN OF MILITARY AIRPLANES	614
Glider contests, terrain for	275
GOTTSCHALK, V H. ON SOCIETY'S RESEARCH SHEDS NEW LIGHT ON FUEL PROBLEM	3, 211
Grading by "enumerated defects" wrong principle	97
GREER, E R. ON AUTOMOTIVE TRANSPORTATION BY TRAILERS	19

Grinding

Cost of gear	174
Gear	173
History of gear	174
Salvaging versus finish gear	173
Types of machine for gear	174
Group-bonus wage-incentive plan (E Karl Wennerlund)	27
Guarantee or policy work for service	201
	H
Hand-work	159
Hannover sailplane, development of the	77
Hardware, types of taxicab	481
Hardwood-lumber needless waste (F F Murray)	95, 455
Hardwood lumber standardization	62

Hardwood

Corrective effort to be applied in safe and sane way of grading	98
Economic reason for high price of	97
Grading by "enumerated defects" wrong principle	97
Great opportunity for simplification of grading	98
Interests of consumer and producer bound together	93
Lumber needless waste	95, 455
Not yet "developed" to provide full utilization value	95
Present grades inadequate, obsolete and wasteful	96
Reason for obsolescence of present grade-basis	96
HASSON, J O. address	504
HASTINGS, DON T. ON DEVELOPMENT OF A MODERN SERVICE-SYSTEM	193, 539
HATT, W K. ON RESEARCH FOUNDATION FOR THE ECONOMIC THEORY OF HIGHWAY IMPROVEMENT	294

Haulage

Distance and economy of operation	471
Successful tractor and semi-trailer railroad-terminal	467
Tremendous volume of tonnage handled	468
HAZELETT, CLARENCE W. ON IMPROVED STORAGE-BATTERY CONSTRUCTION	445

Head-Lamps

Anti-glare	101
Double-reflector type of	100
Glare problem in Europe	109
Glare session at summer meeting	618
Heat-transfer coefficients	58
HERON, S D. ON AIRCRAFT-ENGINE PRACTICE AS APPLIED TO AIR-COOLED PASSENGER-CAR ENGINES	31
HERRMANN, K L. ON SOME CAUSES OF GEAR-TOOTH ERRORS AND THEIR DETECTION	26
HEYMANN, BRUNO. ON DOUBLE-REFLECTOR TYPE OF HEAD-LAMP	100
Highway economics	76
Highway and traffic recommendations	474

Highways and Roads

Advisory Board on Highway Research	294
Army plan of transport	421
Automobile associations and research	294
Automotive engineer and research	294

Building policy	153			Cooling	257
Economics	76			Direction of rotation	261
Engineer and research	294			General operation	259
Federal agencies and research	294			Idling	259
Federal money	122			Installation requirements	261
Formation of transport centers	429			Lubrication of high-speed	258
Military and commercial transport	413			Reverse-gear	260
National Automobile Chamber of Commerce and research	294			Starting	258
Research foundation for the economic theory of improvement	294			Tendencies in design of high-speed	257
Research reduces costs	129			MATHEWS, DR JOHN A, ON PRESENT AND FUTURE OF ALLOY-STEELS	614
Locating engineer and research	294			MATHEWS, DR JOHN A, ON STEEL	586
Testing performance	448			Mechanics, training automotive	99
